

Back to the Old Days!

By: Ali Haidar

Once there was a country called Printer. This country had a population of one hundred thousand people. Thirty thousand of them were soldiers in the army. The king of Printer was called Anatom.

He became king because of his father. Anatom was obsessed with sword and arrow fighting. He disposed of all the modern weapons and started creating swords and armor. His advisers told him not to do this, but he didn't listen. Movies and web series kept him obsessed with this idea.

Anatom always did whatever he wanted. He was a selfish and careless leader.

Fifteen years passed as he created weapons for the army and trained every single soldier. Every time he looked at his army, he felt happy and proud. He felt like the superpower of the world.

One day, he told his army to get ready for war with America. Everyone was confused. For the first time in seventy years, Printer was going to be part of a war. The year was 2022. The army prepared. Horse riders, bow shooters, and ground warriors gathered at the chosen battlefield.

The Americans were confused when they saw them. They had high-tech weapons including rockets and assault rifles. Everything was set and ready. The war was about to start. Anatom's army was just one word away from beginning the attack. But Anatom was not on the battlefield. He was miles away, watching through a scope. He sent someone to tell the army to assemble.

The war began. They started running toward the Americans. As the Americans saw them approaching, their commander yelled, "Fire!"

With that command, they started firing on the Printers. Bullets and rockets flew toward them like it was a festival. In less than an hour, no one was left alive out of the thirty thousand soldiers. They were defeated before they even reached the Americans. The whole battlefield was soaked in blood and filled with dead bodies. Each of those dead soldiers had families, hopes, and dreams. But with one decision by their leader, everything ended.

The Americans took over Printer and turned it into a prison. Every citizen of Printer became a prisoner. They searched everywhere but couldn't find Anatom. He had vanished.

A reckless decision by a careless leader destroyed hundreds of lives. He disappeared, but his people suffered.

Choose carefully, if you can.
